RE: LETTER OF RECOMMENDATION FOR AKPORARHE TEMITOPE PAUL
Registration Number: IDEAS/IGF/ABJ/55/UI/DS/0100

I am pleased to write this letter of recommendation for Akporarhe Temitope Paul, an intern at the UNICCON Institute of Technology who participated in the **Innovation Development and Effectiveness in the Acquisition of Skills (IDEAS)** program under **Omeife Technologies**, a subsidiary of the **UNICCON Group of Companies**.

During his internship, Paul demonstrated a high level of commitment, enthusiasm, and aptitude for data science and artificial intelligence. His attitude toward work and his technical engagement throughout the program were truly commendable. He consistently met deadlines, contributed meaningfully during collaborative sessions, and showed strong analytical and problem-solving abilities in handling data-related tasks.

Paul's ability to grasp complex concepts—coupled with his practical approach to applying data science tools and techniques—sets him apart as a student with great potential in the field. He is a diligent, responsible, and self-motivated individual, always willing to go the extra mile in pursuit of excellence.

Based on his performance, work ethic, and integrity, I confidently recommend Akporarhe Temitope Paul for any further academic pursuit, internship, or professional opportunity he may seek. I am certain that he will be an asset to any institution or organization he chooses to associate with.

Please feel free to contact us for any additional information or clarification.

Yours faithfully,

Adetunji Philip

Head, Data Science and Artificial Intelligence Department
UNICCON Institute of Technology
